

# Team repo Github

1. Choose your team members.
2. Choose the administrator of your repository.

The **administrator** should follow the next steps:

- Create repository  
→ Go to: <https://github.com/>

## Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner \*

  Julian

Repository name \*

ProjectModernCpp 

Great repository names are short and memorable. Need inspiration? How about [turbo-octo-parakeet](#)?

Description (optional)

 **Public**

Anyone on the internet can see this repository. You choose who can commit.

 **Private**

You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

**Add a README file**

This is where you can write a long description for your project. [Learn more.](#)

Add .gitignore

Choose which files not to track from a list of templates. [Learn more.](#)

.gitignore template: VisualStudio

Choose a license

A license tells others what they can and can't do with your code. [Learn more.](#)

License: None

This will set  main as the default branch. Change the default name in your [settings](#).

 You are creating a private repository in your personal account.

 **Create repository**

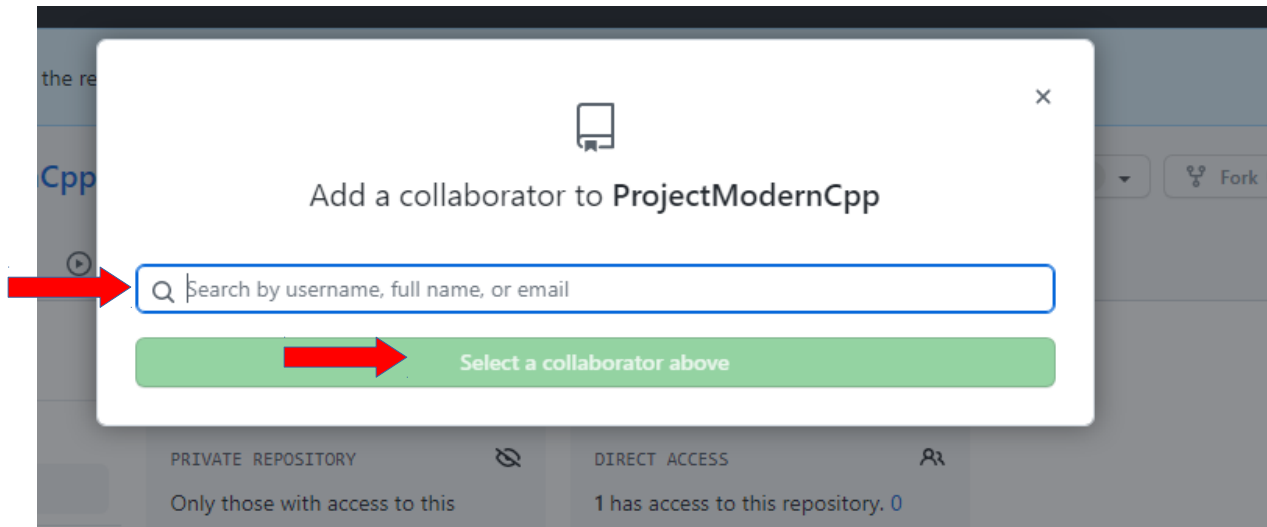

→ Go to repository settings

The screenshot shows the GitHub repository settings page for a repository named 'lulian-unitbv'. At the top, there is a navigation bar with links for 'Code', 'Issues', 'Pull requests', 'Actions', 'Projects', 'Security', and 'Settings'. A red arrow points to the 'Settings' link. Below the navigation bar, there is a section for repository information, including the name 'lulian-unitbv', the initial commit hash 'f5c84ea', and the commit time 'now'. Below this, there is a table showing the files in the repository: '.gitignore' and 'README.md', both with the status 'Initial commit' and 'now'. Below the table, there is a section for the 'README.md' file, showing the title 'ProjectModernCpp'.

→ Access *Colaborators*

The screenshot shows the 'Access' section of the GitHub repository settings page. A red arrow points to the 'Collaborators' link in the left sidebar. The main content area shows two cards: 'PRIVATE REPOSITORY' and 'DIRECT ACCESS'. The 'PRIVATE REPOSITORY' card states 'Only those with access to this repository can view it.' and has a 'Manage' link. The 'DIRECT ACCESS' card states '0 collaborators have access to this repository. Only you can contribute to this repository.' Below these cards, there is a section titled 'Manage access' with a large box containing the text 'You haven't invited any collaborators yet' and a green 'Add people' button. A red arrow points to the 'Add people' button.

→ Add all team members as collaborator

3. Team members need to accept the invitation

4. Clone repository(check HandoutSourceControl)
